

Dec. 19/2006

Hi David,

Thank you very much for reassessing my mark, and I hope you have happy holidays this winter break and lots of rest.

Thanks again for teaching me such an interesting course. I honestly learned something interesting that will be very useful to me when I will approach people with mental conditions. The course taught me new things and better perspectives: those of clients'. Please teach this again and again, as community service students really need this kind of course.

Thanks again for everything. Wish you all the best.

Best regards,

Collaborative Nursing Degree Program (BScN)
